

Call Cruncher Call Reporting

User Guide

What you need to know

There are a wide range of report available in this guide. Not all of them will work in all cases due to many factors.

If you need a report that isn't listed here, we have many other reports that might be able to be added or custom built.

Any screenshots included in this manual have left out the date selection part of the process to simplify the guide and keep it a bit shorter. The part left out looks similar to what is shown below. You can select any range of dates.

You can type in the date you are looking for, or click on the little calendar icon and just select the date range as shown below.

GRAPHS

Nearly every report will show you a detailed report by default but most also have graphing capabilities. Simply select the Graph tab and let the report reload.

What the icons mean

The icons show you that the report is available for Incoming , outgoing , or both incoming and outgoing  reports. In some cases the reporting engine requires some input from the user. For these reports, you will see an action button.
