

## Sign In

### To Access the Admin Tools Area Within Cloud Services Portal:

Go to the website provided to you by the Service Provider to enter your Administrator Username and Password to Sign In.  
During the initial sign in process, follow prompts to setup/use MFA protocols and acknowledge Terms and Conditions to proceed.

## Admin Tools Menu

The **Admin Tools Menu** on the left side of the dialog offers permission-based access to useful administration sections. Only sections related to services on the Organization's account can be displayed in this area.

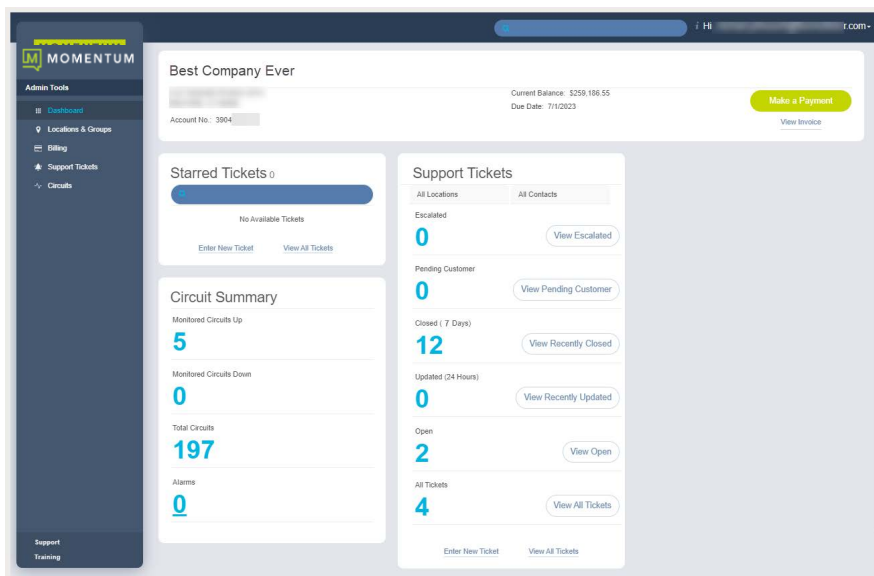

- ❖ **Dashboard** - The home page for Administrators
- ❖ **Locations & Groups** - Group level portal Admin account / access management tools
- ❖ **Services & Users** - Lists current user and service accounts with access to administration tools
- ❖ **\*Billing - Restricted Access**. Advanced Billing information and payment management for authorized personnel only
- ❖ **\*Support Tickets - Restricted Access**. No Access by Default. Authorized Admins may be granted access to view the list of currently open tickets (read-only) and/or submit (full access) non-emergency requests for assistance or information to Customer Support
- ❖ **\*Circuits** - Review the list of known network circuit devices in inventory (monitored/known unmonitored) and related data, and review or submit (where additionally authorized) support tickets for data/circuit-related issues
- ❖ **\*Circuit Devices** - Review a list of circuit-related devices and some basic information for each.
- ❖ **\*Service Locations** - View map locations of circuits in inventory and related data
- ❖ **Manage MFA** - Review account MFA activation status/Reset MFA management tool

\* *Restricted/Limited access tools that require additional authorization for each Administrator.*

## Data Admin Dashboard

The Home page for Administrators. The Admin Dashboard provides at-a-glance views of *Live* and historical account activity, AND direct **filtered** quick-access links from each card section to the administrator-level tools, services, and feature pages found in the menu on the left. Now you can see and track everything that is going on and access any area or service you need to manage from one web page - **fast**.

*Example view of a typical SuperAdmin account Dashboard*

## DATA ADMIN DASHBOARD FEATURES

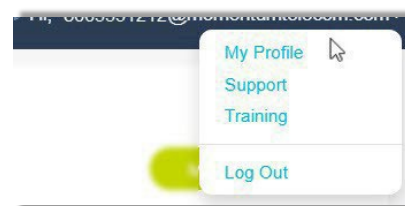

### Site Search

The Search field at the top of the application dialog offers site-wide search functionality within the areas the Admin may access.

### Admin Information

The **Hi, <User Name>** area at the top of the application opens a drop-down list of quick access links to view your current profile to update the password, manage your MFA method, and open links to review Support and Training resource information, or Log Out.

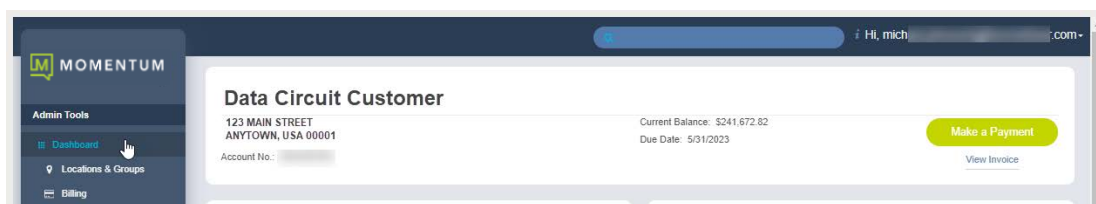

### Data Admin Dashboard Sections

Each section and widget (card) featured within the Admin Dashboard provides useful information, tools, and filtered access links to the relevant work areas. Unfiltered access to those areas is offered in the Admin Tools Navigation Menu Panel on the left side of the screen.

#### Profile

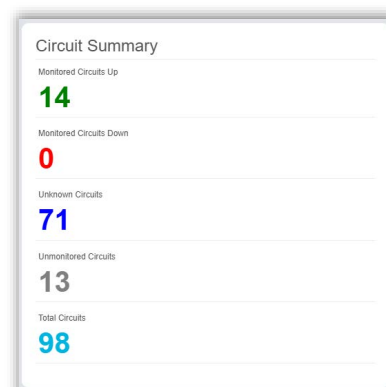

This card at the top of the Dashboard offers account information including the address and account number for most Administrator accounts.

If viewed by the SuperAdmin or a Billing Admin, information about the current account balance, and links to the latest invoice information and to the [Billing](#) page to review billing data or make a payment is available in this area, as well.

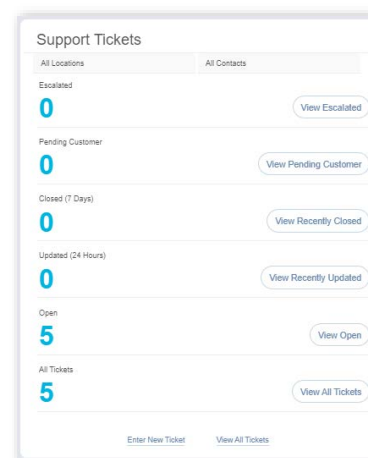

### \*Circuit Summary

The Circuit summary card displays the current counts for the Circuits and networking devices discovered in **inventory** for the organization along with basic information and the Alarm count data for the *monitored* devices.

### \*Support Tickets

\*This section requires sufficient access permissions to Support Tickets to view and/or to view all features. This dashboard card displays the most recent support ticket activity and offers filter tools, links to review specific tickets (filtered views), and a link to review the full list of open and recently closed items in the Support Tickets page.

### \*Starred Tickets

This section requires sufficient access permissions to Support Tickets to view and/or to view all features in it. The card offers searchable quick view of the tickets the account holder has selected to watch (★ Starred). Click on a ticket number link to view the ticket information.

Click on the orange star adjacent to an item to remove the item from 'watched' status and from this list upon refresh.

Where authorized, Admins may also have access to the **View All Tickets** link for direct access to open the [Support Tickets](#) page and review the list of currently Open and recently closed trouble/information support ticket submissions (within the last seven [7] days) .

★	Ticket...	Subject	Prior...	Esca...	Status	Last Up...
★	<a href="#">01568571</a>	TEST - ...	Minor	no	New	06/09/2...
★	<a href="#">01501528</a>	test ign...	Minor	no	Closed	05/23/2...
★	<a href="#">01554393</a>	QA Test...	Minor	no	New	06/09/2...
★	<a href="#">01553712</a>	test	Minor	no	New	06/09/2...
★	<a href="#">01552796</a>	TEST - ...	Minor	no	Open	06/05/2...

1 - 5 of 6 items

### \*Important Note:

Some Admin Dashboard sections discussed in this document may not need to be displayed in your system -OR there may be additional dashboard sections that display voice tools where those features/services are also in use on the account which are not discussed here and can be reviewed in the *My Cloud Services Admin Guide*.

To secure data appropriately, by default only the organization's designated SuperAdmin has access to view all available Admin Dashboard sections and tools, based on the purchased services and products on the account.

*The Dashboard sections display to all others based on purchased services or products and the individual account holder's authorization level as assigned by the organization's designated SuperAdmin. Only Full Access permissions to advanced tools will allow a related section to display with all features in the Admin Dashboard.*

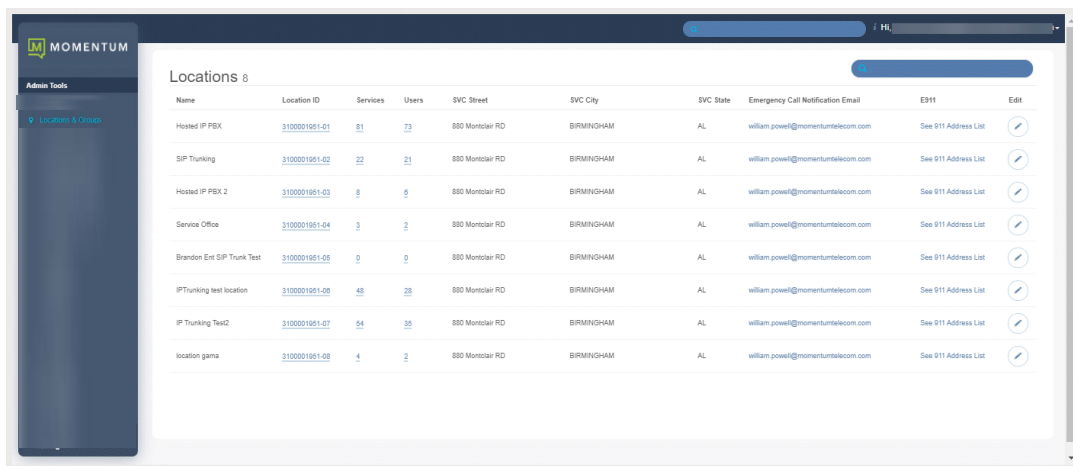

## LOCATIONS & GROUPS

*Review and manage settings for the Users and Groups that are assigned to Locations.*

The **Locations** page provides a searchable table listing of the Locations currently configured on the account.

Authorized Admins may use the Section Search to locate specific terms within the table, use the column headers to sort the list alphanumerically, and access the following areas for each Location listed on the page:

- **Location ID, Services, and Users** - Click on the number displayed for a Location in these columns to open the related list within the **Services & Users** page.
- Links to review and manage user assigned each location.
- **Edit icon** (far right column) opens the **Group Settings** dialog for the selected Location.

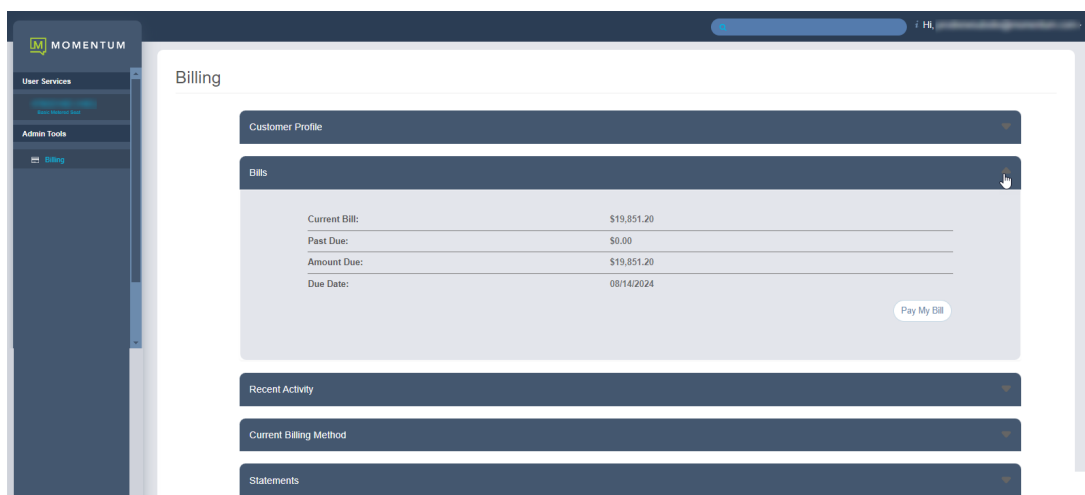

Name	Location ID	Services	Users	SVC Street	SVC City	SVC State	Emergency Call Notification Email	E911	Edit

## \*BILLING

*Restricted Access. Authorized Admins may review and manage account billing information and payments.*

The **Billing** page displays current account and balance history information (at the Enterprise or - where enabled - at the Location level, with easy access to the tools that allow Admins to review and manage statements, edit the billing payment method information, setup routine monthly payment schedules, and even immediately pay the current bill when necessary. Billing tools include:

[Pay My Bill](#) • [Billing Method Setup](#) • [View Statements](#)

## \*SUPPORT TICKETS

*Displays contact information for Customer Care. Advanced access permissions required to view or use advanced tools.*

The Support Tickets section and related tools require authorization to view or manage.

Support Ticket submitters need to be Authorized Customer Support Contacts for the organization. Default access level is NONE (section and tools are not visible) for all portal user types except the SuperAdmin who has FULL access by default and manages all other users' access. The Read-Only access option allows viewing-only access to the current ticket list and data based on Admin/User settings. FULL access permission to Support Tickets is required to submit tickets and access related ticket management tools.

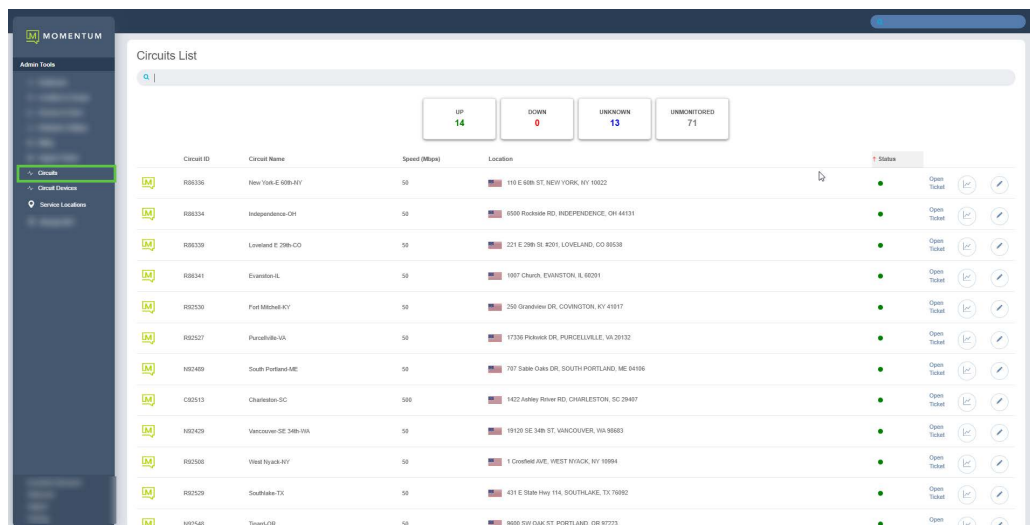

## \*CIRCUITS

*Access to review available circuit-related information for basic monitoring.*

This section only displays in Admin Tools for those organizations with known Data/Networking/Circuits (generally those purchased from the Service Provider), and offers access to view useful performance (up/down) information, if monitored. Note: Some Admins may be granted advanced permissions authorizing read-only views or access to submit Support Tickets, although the system automatically generates support tickets and notifications if a monitored service is impacted.

[Edit Basic Portal Display Information](#) • [View Monitored Devices' Current Status](#) • [View Useful Metrics and Maps](#)

## \*SERVICE LOCATIONS & \*CIRCUIT DEVICES

Review additional information about your organization's monitored and known unmonitored circuits.

If visible, the **Service Locations** menu link opens a user-friendly map view of the circuits your organization identified as in your inventory that are currently being monitored by the service provider, as well as those disclosed by your organization but that are not currently monitored by the service provider. The **Circuits Devices** section offers a list of known circuit related devices in inventory for easy access to device ID and serial number information and circuit association(s).

The screenshot displays two main components of the Momentum Cloud Services Portal interface:

- Service Locations:** A map view showing various locations across the United States. A sidebar on the left includes a 'Statistics' panel with data: Total Count: 80, Online: 10, Offline: 13, Monitored: 77. A legend indicates 'Online' (green), 'Offline' (red), 'Monitored' (blue), and 'Unmonitored' (grey).
- Circuit Devices:** A table listing circuit-related devices. The table has columns for Status, Location, Serial Number, and Circuits. The Circuits column includes links for 'Circuit' and 'Service ID'.

## MANAGE MFA

Access to view the status of Multi-factor Authentication protocol adoption by portal users/admins.

The **Manage MFA** section offers access to a searchable and sortable list view of the portal access accounts that have set up MFA, along with a Reset MFA tool that lets the Admin disconnect an account holder's current MFA protocol thus allowing access to the portal using username/password credentials (if MFA is Optional) OR to setup their MFA protocol again during the next sign in attempt (if MFA is Mandatory).

The screenshot shows the 'Manage MFA Users' section of the Momentum Cloud Services Portal. It features a table with the following columns: User ID, Azure User Name, Email, Verification Method, Last Reset, and Manage User. Each row represents a user with MFA enabled, and a 'Reset MFA' button is provided for each user.

User ID	Azure User Name	Email	Verification Method	Last Reset	Manage User
41 38	prodr...	jmomentumtele...	app	2023-11-09	Reset MFA
21 37	20569	ymtn.us	app	2024-02-14	Reset MFA
